

Kevin Guerra

Senior Solution Architect · Cloud, Distributed Systems, Performance & Security

Fresno, CA (Remote) · (559) 487-5870 · kevingnet1@gmail.com · linkedin.com/in/kevin-guerra-36151446 · kevingnet.github.io/kg-portfolio

SELECTED HIGHLIGHTS

- **Performance:** Cut geospatial pipeline from ~2 hours to 11 minutes (Google Earth) via branch reordering, invariant caching, and parallel Postgres import.
- **Architecture:** Replaced stalled ~45k LOC system with ~24k LOC greenfield stack + 2k LOC RBAC module; shipped in 7 months after two years of stagnation.
- **Automation & vision:** VMware QA framework 80k → 8k LOC (~8× faster); rebuilt failed OCR pipeline (6-person/4-year prior effort) in <2 months.
- **Reverse engineering:** Decoded Symantec Ghost disk format (IDA Pro); production support in ~2 weeks.
- **Security:** OSCAP/OWASP hardening (Veritas, HPE); privacy/M&A audits at Meta-scale environments.

CORE SKILLS

Languages: Python, C/C++, Java, C#, JavaScript/TypeScript, SQL | **Cloud & infra:** AWS (EC2, S3, Lambda, RDS, API Gateway, CloudFormation), GCP, Docker, Kubernetes, VMware | **Data:** PostgreSQL, Oracle, MongoDB, Cassandra, Redis, BigQuery | **Domains:** Microservices, REST/API design, OpenCV & image processing, OAuth2/RBAC, OWASP, digital forensics, embedded & kernel-level systems

PROFESSIONAL EXPERIENCE

Sr. Software Engineer — R&D Staff

Apr 2025 – Present

MAF RODA Agrobotic

Current role (3rd at MAF RODA): Americas traceability lead

- **Traceability — Americas (current):** Lead traceability systems across the Americas; apply AI heavily on the engineering side — developer tooling, codebase modernization, and AI-assisted improvements to traceability projects and delivery workflows.
- Designed and built Python-based installer automating fleet deployment for fruit-sorting systems: WMI discovery, network configuration, and end-to-end software provisioning across local machine clusters.
- Optimized OpenCV image-processing paths with SIMD and allocation strategy that pre-allocates buffers at startup — reduced runtime memory footprint and buffer churn on production sorters.

Senior Solution Architect

Jul 2023 – Apr 2025

Independent Consultant

- Architected AWS microservice systems (EC2, S3, Lambda, API Gateway, CloudFormation) with REST integration for multiple clients.
- End-to-end delivery in C++, Java, C#, Python, .NET, and JavaScript — design through deployment and performance tuning.

Sr. Solution Architect

Nov 2022 – Jun 2023

Leidos · Contractor (KForce) · Remote

- Secure airport scanning application (C++, Qt5, Python) with imaging pipeline for high-assurance environments.
- Enterprise architecture and performance work (profiling, caching) for high-transaction systems.

Sr. Software Engineer / Solution Architect

2018 – 2022

Google — multiple teams · Contractors · Remote / Mountain View

- **YouTube, Hardware, Devices (2018–2020):** Java/C++/Python microservices; Python/Angular/TypeScript on Borg; authN/authZ, audit tooling, BigQuery pipelines.
- **HR (2022):** Java microservices (Guice, Protobuf) for privacy-conscious internal tooling.
- **Earth Enterprise & L10n (2020–2022):** See highlights — geospatial speedup; greenfield replacement of legacy web platform with OWASP-aligned RBAC.

Solution Architect

Mar 2021 – Jan 2022

Intelliswift · Contractor (Accenture) · Remote

- AWS serverless and hybrid cloud architectures (Lambda, EC2, S3, RDS, CloudFormation, API Gateway).
- Multi-language static-analysis platform (Java) with VS Code/PMD integration; built test harness and mentored delivery team.

Privacy Audit Engineer

Oct 2020 – Mar 2021

Meta (Facebook) · Contractor (DISYS)

- Privacy/security assessments for acquisitions; tooling to standardize architecture reviews across SQL/NoSQL estates.

Senior Software Developer / Solutions Architect

2015 – 2018

VMware · Veritas · HPE · Contractors

- See highlight — VMware QA framework (80k → 8k LOC, ~8× faster).
- OSCP/OWASP hardening and OAuth2/LDAP integration on NetBackup and Airwave appliances.

Roles from 2013 and earlier — OpenTV, digital forensics, embedded/AV systems — see Kevin Guerra — Experience History.pdf.

EDUCATION

El Camino College — Redondo Beach, CA · Computer Science · 2000
