

Testing

- ✓ Test System to Ensure that it performs according to specification
- ✓ Identify Defects, Fix Defects and Document Findings
- ✓ Update Manuals, User and Technical Documentation
- ✓ Deliver Release Version of Application

- Ensure that test plans have been created and that they are being followed. This includes a library of test data, driver programs to run through the test data, and documentation of the results of each formal test that has been performed.

- Ensure that the test plans that are created do in fact address all of the system specifications.

- Ensure that, after testing and reworking, the software does indeed conform to the specifications.
