Detailed record of engagements prior to the condensed timeline on the primary resume. Use together with *Kevin Guerra — Resume.pdf* for full career context.

PROFESSIONAL EXPERIENCE

Software Expert — Staff Mar 2013 – Mar 2014

OpenTV · Mountain View, CA

- Maintained and enhanced cable-industry client/server platform (~1M+ LOC): VC++, C#, .NET, MFC, XML, web services, IPC.
- Oracle database development (SQL, stored procedures), IIS deployment, Crystal Reports, and Perl automation.
- Delivered bug fixes and feature work on latency-sensitive set-top and head-end integrations.
- Redesigned closed-captioning module for set-top box — eliminated runtime memory allocation/fragmentation that caused UI slowdowns.

Senior Software Engineer Nov 2005 – Dec 2006

Guidance / Spirent · Consultancy

- Built Win32 digital-forensics tooling for cellular and embedded device data extraction.
- Reverse-engineered commercial disk-imaging format (IDA Pro, hex analysis); shipped C++ support in ~2 months.
- Developed next-gen UI via SWIG/Tcl accessibility layer; refactored network-test commands on ACE framework.
- Tools: Visual Studio, WinDbg, IDA Pro, DDK, SoftICE.

Application Security Specialist — Staff Mar – Nov 2005

Hypermedia Systems, Inc. · Los Angeles, CA

- Performed application security assessments; documented vulnerabilities and remediation plans.

- Built assembly-optimized input-validation library (regex-driven) with Java, C, and Perl bindings on Linux.
- Trained development teams on secure SDLC and malware detection practices.

Programmer Analyst Apr 2001 – Mar 2005

Independent Consultancy

- Delivered business applications and database solutions for diverse clients.
- Built ActiveX control for MS SQL → XML export; database logger control; poll-results printing application.
- Web development with CMS integration — MS SQL, ADO, MS Access, MFC/C++, HTML, XML, JavaScript.

Senior Programmer Analyst — Staff Jan 2000 – Apr 2001

Electrosonic Systems, Inc. · Burbank, CA

- Full lifecycle ownership: design, implementation, profiling, documentation, and team mentorship.
- Remote monitoring/control app (C++, COM+, MAPI, TAPI, RAS); rewrote connectivity DLL for serial/IP with raw sockets, threading, and double-buffering.
- Device protocols, ActiveX/ATL controls, MDI GUI, scripting, XML config, email reporting.
- Museum & venue deployments: American Museum of Natural History, Museum of Tolerance, Country Music Hall of Fame, Shoah Foundation, and others.
- Hardware integration: MPEG encoding, video overlay to TV, magnetic card readers, touch panels, RealAudio streaming.

CROSS-CUTTING ACHIEVEMENTS (HISTORICAL CONTEXT)

- Led replacement of unreliable text-recognition module (prior 6-person / 4-year effort) with new OCR and image-recognition approach outperforming FFT — delivered in under two months.
- When critical source code was unavailable, architected cloud replacement for 5-developer / 4-year legacy system: ~10% of provided LOC, SPA frontend with ~30 ms average response, security module, live in ~7 months.

EDUCATION

El Camino College — Redondo Beach, CA · Computer Science · 2000
